Professional Summary

Backend developer with more than 4+ years of experience in Node.js. Skilled in creating APIs, troubleshooting issues, improving performance, and working with teams to deliver reliable solutions.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, Fastify, NestJS, REST APIs, Microservices Architecture

Databases & ORM/ODM: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis, Sequelize, Mongoose

Cloud & DevOps: AWS (Lambda, SQS, S3, EC2, RDS, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD, Git

Authentication & Security: JWT, OAuth 2.0, Payment Gateway Integrations (Razorpay, Cashfree, PayU, PayPal)

Testing & Tools: Jest, Mocha, Postman, Swagger, NPM

Experience

Aza Fashions Private Limited

April 2023 – Current

Software Engineer

- Built a scalable **Gift Card** feature integrated with multiple **payment gateways** (Razorpay, Cashfree, PayU, PayPal, PayGlocal), including retry and error-handling logic for failed transactions – driving an **11% rise in gift card usage** and **4.36% increase in order volume**.
- Designed a rule-based **promo/coupon engine** supporting 10+ combinable discount types (designer-specific, timer, freebie, region, category, platform, employee, clearance, user-type) with a **Coupon Management Dashboard** for country/device targeting – lifting coupon usage by **7%** and sales by **5%**.
- Architected a dynamic **tier-based loyalty system** with real-time points calculation and automated customer classification, improving engagement by **9%** and retention by **7%**.
- Re-engineered the **checkout microservice** (Aza V2) using **Redis caching**, **AWS SQS**, and **AWS Lambda** for parallel cart/address/payment processing, cutting **API response time by 40%** and **checkout time by 30%**.
- Built order placement logic across **5 payment gateways** with client-independent success confirmation, automated **LimeChat** order notifications, CS-assisted order creation, and an **order monitoring system** to auto-flag transaction inconsistencies.
- Developed core checkout services – expected delivery date, GST verification, TaxJar, address caching, and courier-priority logic via **ClickPost** integration (incl. partial-COD and COD-courier payment routing) – optimized for high-traffic, low-latency response.
- Built a real-time **lead dashboard** surfacing live user page/session data with behavioral tags (high-value, repeat, exclusive) and ticket-size mapping to support sales conversion tracking.
- Integrated **MoEngage**, **LimeChat**, and **CleverChat** for customer engagement automation, and shipped Region-wise Landing Pages, Trunkshow, Store Appointment Booking, and Referral Program modules, alongside DB optimization scripts that cut data retrieval time by **20%**.

Accubits Technologies Inc.

June 2022 – Feb 2023

Software Engineer Intern

- Designed scalable **APIs** and a transaction dashboard for **50,000+ users**, and built **Zoho API** integrations (Books, Finance, Inventory, Billing) automating 15+ workflows across 5+ departments – improving processing speed by **30%**.
- Built a secure **user authentication system** (Node.js, Express, JWT, OAuth 2.0) and resolved **50+ critical bugs** using Git-based workflows, improving reliability and usability.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar

2023–2025

Master of Computer Applications (M.C.A.) (CGPA: 9.47 / 10)

Bhubaneswar, Odisha

R.J. College, Mumbai University

2019–2022

Bachelor of Science (B.Sc.) in Computer Science (CGPA: 9.96 / 10)

Mumbai, Maharashtra
